Professional Summary

Results-driven MERN Stack Developer with a strong command of MongoDB, Express.js, React, and Node.js, specializing in designing scalable architectures, building high-performance RESTful APIs.

Projects

Resume Builder Mern

A dynamic resume builder application developed using the MERN stack, leveraging core technologies like MongoDB, Express, React, and Node.js along with Framer Motion for smooth animations, ImageKit for media handling, and Render for deployment, enabling users to create, customize, and manage professional resumes through a responsive, high-performance, and scalable web platform.

ChatWave Mern

A full-stack chat and video call application developed using the MERN stack, integrating GetStream.io for real-time messaging and video calling, featuring secure authentication, scalable REST APIs with Node.js and Express, a responsive React interface, MongoDB for data persistence, and complete deployment on Render for production-ready performance.

Education

X
